

FOOD & BEVERAGE MANUFACTURERS FEEL THE SQUEEZE

Delivering World-Class Technology Solutions to the Food and Beverage Industry

No industry is more competitive or moves faster than food and beverage. There is a squeeze from every direction that makes even the simplest processing plant more complex. For over 25 years, Flexware Innovation has successfully delivered world-class technology solutions to the industry's leaders to address this squeeze.

If you face **quality and compliance** pressures, our solutions can track and trace every step of the value stream and even provide error-proofing technologies to prevent problems. **Changing consumer demands** and **increasing competition** requires an ever-increasing efficiency to pivot quickly. **Breakdowns in the supply chain** (your own and the larger network) require enhanced and timely visibility to respond appropriately. And **changes in technology** are coming faster than ever before, but when is the right time to move from legacy systems? These are just a few of the pressures we address for food and beverage manufacturers like you.

A PARTNER YOU CAN TRUST

There are common challenges that most every food and beverage manufacturer face. We've experienced them with countless complex manufacturers across the industry. At the same time, each manufacturer is unique and requires our team to understand each customer's problems and goals, their facilities, existing systems, processes, and people.

AUTOMATION / CONTROL SYSTEMS ENGINEERING

Turnkey automation hardware and software systems to fit virtually any process with streamlined integration and implementation.

- HMI / SCADA Systems
- Industrial Networking
- Control Panel Design & Build
- PLC Programming
- Process Automation
- Vision Systems
- IIoT Solutions
- Automation / Control systems engineering

SYSTEMS INTEGRATION / SOFTWARE DEVELOPMENT

Updating aging enterprise systems or adopting new technology can provide critical information for real-time production decisions.

- Application Development
- Manufacturing Execution Systems (MES)
- System Specification Consulting
- System Platform Health Assessments
- Emerging Technologies (AMRs & AGV Integration, AR/VR, and RTLS)
- Custom Software Development

BUSINESS INTELLIGENCE

Complete visibility into historical and real-time data, presented in user-friendly formats, allowing for quick business decisions.

- KPI Dashboards
- Manufacturing Analytics
- Data Management
- Real-Time Production Monitoring
- Consultative Assessment
- Architecture Design

ENTERPRISE SOLUTIONS

Effective ERP integration streamlines business and financial processes across departments, organizational levels, and facilities.

- Enterprise Architecture
- Systems Upgrade
- Business Process Improvement
- Digital Transformation & Cloud Solutions
- System Health Check

FLEXWARE[™]
innovation
A Hitachi Group Company

Flexware Innovation is the go-to engineering firm for forward-thinking manufacturers that need to integrate their business and production systems. Since 1996, Flexware has provided best-in-class software development, automation engineering, manufacturing systems integration (MES, HMI/SCADA, & ERP), business intelligence solutions, Internet of Things (IoT) devices, and specialized product development.
