

STANDARDIZATION MADE SIMPLE

AN IGNITION-BASED **SCADA FRAMEWORK**

Streamline Your Operations with an Ignition-Ready SCADA Framework

Take the uncertainty and hassle out of creating SCADA screens in Ignition. SparkSCADA™ makes it simple to implement uniformity across your whole facility or company. It is designed primarily for manufacturing processes, including oil, gas, power, energy, and utilities for a variety of industries. With Spark, you can quickly and confidently create screens that drive efficiently.

The foundation of Spark is built on Inductive Automation's Ignition platform, which offers a framework that is both scalable and flexible. Ignition is utilized by half of today's Fortune 500 firms and offers the same flexibility and low cost of ownership as SparkSCADA™. Contact us to learn more.

PRE-BUILT TEMPLATES

Prefabricated process object templates designed to enhance SCADA implementation for manufacturing processes.

PLC AGNOSTIC

Simply connect it to any PLC; no programming is required.

CONFIGURABLE

Flexibility to make changes internally, such as integrating new PLCs, valves, or motors.

ISA-101 COMPLIANCE

Templates for user-friendly displays and control systems that are ISA-101 compliant.

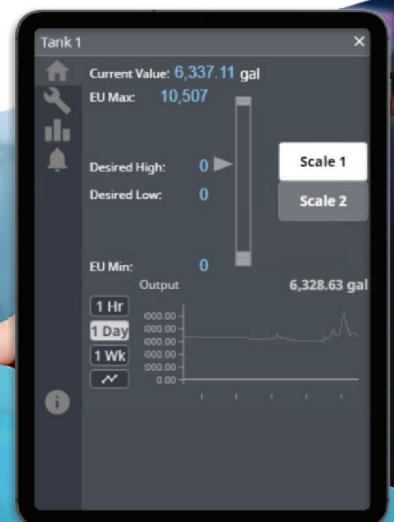

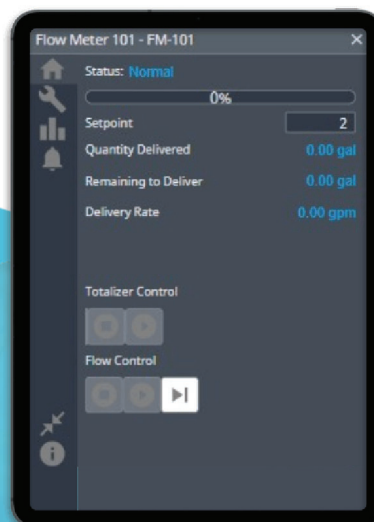

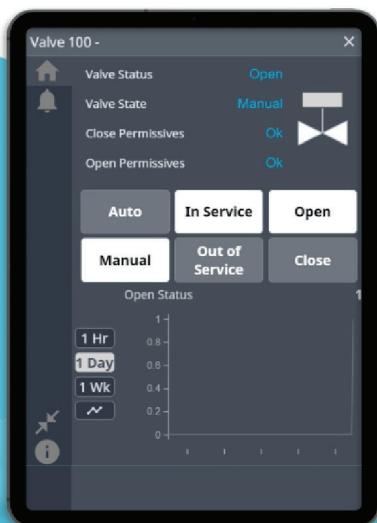

STANDARDIZATION MADE SIMPLE

Copy previously configured items such as pumps, valves, and tanks for enterprise-wide consistency.

SCALABLE

Reduces dependency on programmers and increases change management and resiliency.

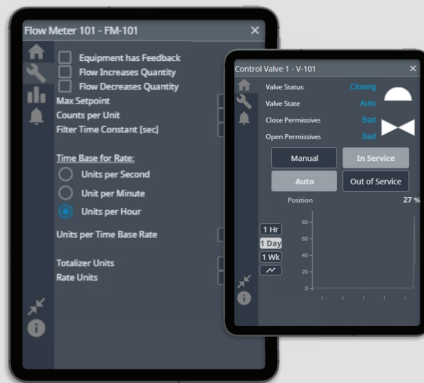

How Can SparkSCADA™ Improve Your Manufacturing Operations?

- ✓ Standardizes HMI/SCADA displays across a plant or entire enterprise
- ✓ Quickly create and deploy HMI displays using pre-made, Ignition-ready layouts
- ✓ Reduces costs by being PLC-independent and requiring neither coding nor a programmer.
- ✓ Monitor, control, and visualize every aspect of operations for intelligent control
- ✓ Fast and seamless Ignition factory implementation

It's frustrating and costly when procedures aren't optimized for efficiency

You deserve easy-to-use technology solutions to streamline your manufacturing operations. Whether you're just getting started with Ignition or already have it in place, our team is here to get you on the path to standardizing your SCADA.

SparkSCADA™ Pricing

SparkSCADA.....\$10,000

Take the uncertainty and hassle out of creating SCADA screens in Ignition. SparkSCADA™ makes it simple to implement uniformity across your whole facility or company. It is designed primarily for manufacturing processes, including oil, gas, power, energy, and utilities for a variety of industries.

SparkSCADA™ is developed on the **Ignition** platform by **Inductive Automation**. Ignition is used by half of today's Fortune 100 companies and provides the flexibility and a low cost of ownership that gives SparkSCADA™ these same qualities.

PREMIER IGNITION INTEGRATORS

Flexware has been an active systems integrator in the manufacturing IT business for more than 25 years, with specialties including HMI/SCADA, OEE, Business Intelligence, and Manufacturing Execution Systems (MES).

Flexware Innovation was early adopters of Inductive Automation's Ignition platform, where we've since achieved premier-level integrator status. We've implemented Ignition for over fifty manufacturers in food and beverage, life sciences, automotive, metals & steel, and consumer products.

We are proud to be a Gold-Certified Premier integrator, the Top Integrator of the Year in 2020, in the Top 10 for several years running, winners of multiple Firebrand Awards.
