

BUSINESS INTELLIGENCE & DATA ANALYTICS

**Delivering World-Class BI Solutions to Help Enterprises
Make Smart Decisions and Grow Efficiently**

As a manufacturer, you are constantly facing challenges that can impact the efficiency and profitability of your business. These challenges may include managing complex supply chains, optimizing production processes, and making informed decisions about market strategy.

A business intelligence (BI) solution can help you overcome these challenges by providing real-time data and insights that enable you to make more informed decisions about your operations.

Regardless of where you are on your BI maturity journey, Flexware is here to help you unlock the full potential of data-driven decision-making. With our expert guidance and advanced BI solutions, we can help your company elevate its operations and achieve new levels of success.

Are you ready to take your manufacturing business to the next level with business intelligence? Flexware can help, no matter your industry or size. Whether you are a small manufacturer or Fortune 500 company, Flexware can help you optimize operations and outperform the competition – let us assist you on the path to growth.

BUSINESS INTELLIGENCE & DATA ANALYTICS

SPEND LESS TIME WORRYING ABOUT DATA AND MORE TIME FOCUSING ON YOUR OPERATIONS

If you are struggling to manage data and make sense of the vast amount of information available to you, Flexware can help. Our team of experts has the tools and expertise to locate and design a BI solution that meets the specific needs of your business.

Reporting & Visualization

Presenting data in a clear, actionable format by utilizing dynamic dashboards and immersive reporting

Enterprise Data Architecture

Get meaningful metrics from a centralized, trusted data ecosystem dedicated solely to reporting and analytics

Real-time Analytics

Maximize production and quality with reliable, real-time data from your operations

Data Engineering

Streamline inconsistent, siloed data through automated processes to optimize, structure, and clean it for your needs

Data Governance

Establishing protocols and metrics to guarantee the integrity, timeliness, and safety of data throughout your organization

Data Warehousing

Consolidate and aggregate transactional data from several data sources into a single location for reporting purposes

Predictive Analytics

Detect irregularities to forecast and prevent downtime, quality concerns, and productivity losses, then act to resolve them quickly

Data Science & Machine Learning

Utilize today's most innovative technical solutions in your enterprise to solve complex problems

BI & Data Assessments

Identifying gaps in data collection methods and understanding how they support or undermine your desired goals

OUR EXPERIENCE

Get the power of an expert BI team with decades of experience building custom reporting solutions across all industries.

- Automotive
- Consumer Goods
- Discrete & Industrial
- Energy
- Food & Beverage
- Life Sciences
- Pet Food
- Steel & Metal
